Nils Demougeot

Arlington, MA | +1 (339) 241-7161 | nils.demougeot@gmail.com | linkedin.com/in/nils-demougeot
github.com/nils-demougeot | Portfolio: nils-demougeot.github.io (19 projects, 13 interactive demos)

U.S. Permanent Resident – no sponsorship required | Seeking a Data Science / ML internship, April – July 2027

Education

ESILV – Engineering School Léonard de Vinci — Paris, France
Master of Engineering (Diplôme d'Ingénieur), Data Science & Artificial Intelligence — *Expected June 2028*

- Relevant coursework: Machine Learning, Neural Networks & Deep Learning (TensorFlow), Mathematics for Deep Learning, AI Algorithms, Advanced Probability, Programming for Data Science

Riga Technical University — Riga, Latvia
Exchange Semester – Telecommunications & Data Transmission — *Aug 2025 – Jan 2026*

International School of Boston — Cambridge, MA
French Baccalaureate, Mathematics & Physics-Chemistry – Highest Honors — *2021 – 2023*

Experience

Transdev – Cybersecurity & Data Analysis Intern — Paris, France
Cybersecurity team, Transdev France — *Jun 2025 – Aug 2025*

- Analyzed 1+ TB/day of file-transfer logs (CrowdStrike Falcon EDR, Netskope proxy) to detect data leaks
- Built 3 CrowdStrike Next-Gen SIEM dashboards and hourly alerts that surfaced previously undetected leaks
- Cut investigation time by ∼1 hour per case; dashboards and alerts are still in production today
- Developed in-house tooling that avoided tens of thousands of euros in third-party CrowdStrike add-on costs

Massachusetts Institute of Technology (MIT) – Research Intern — Cambridge, MA
Research Laboratory of Electronics – Network Coding & Reliable Communications Group — *Jul 2022 – Aug 2022*

- Implemented Random Linear Network Coding in Python to model network data and optimize transmission protocols
- Simulated 40,000 packet generations (throughput, delay vs. loss rate), validated against a binomial model

Projects

Soccer Match Outcome Prediction (French Ligue 1) – Python, scikit-learn, pandas

- Merged 8 datasets (∼390K rows), engineered rolling form features with no data leakage, time-based validation
- Logistic regression, random forest, gradient boosting: 52% accuracy vs. 44% baseline, final 3-feature model

La Fabrique – Textile Upcycling Student Startup – Python, Django, PostgreSQL

- Led technical development for a 6-person team, from user research and business model to the final pitch to a jury
- Designed, built and deployed a mobile-first web app: garment photo analysis, sewing patterns, impact tracking
- Won the Startup Spirit Award among ∼140 teams at ESILV's annual project showcase

Ultimate Tic-Tac-Toe AI – Python: minimax search with alpha-beta pruning and iterative deepening

Leadership

DeVinci Durable – Head of Communications & Board Advisor — Paris, France
Student sustainability association — *2025 – Present*

- Lead a 10-person team creating content and awareness campaigns
- Organized the opening of a 600 m^2 (6,500 sq ft) urban community garden and a 4-day eco-seminar in Marseille

Skills & Interests

Programming: Python, SQL, JavaScript, PHP, HTML/CSS, C++, C#, Django, Git

Data & ML: pandas, NumPy, scikit-learn, Matplotlib, seaborn, statistics & probability, CrowdStrike Next-Gen SIEM

Languages: French (native), English (fluent), Spanish (intermediate)

Interests: volleyball (3 years competitive, incl. an international competition in Washington, DC), handball (8 years competitive), tech YouTube channel
